

ISO Solution for Small Businesses

A service from www.9000world.com.

GET ISO DONE NOW

The smallest of companies, even those with 1 to 100 employees, are now faced with the customer requirement for ISO 9000 certification. In many cases, current or potential customer business is at stake. It's now time to get it done.

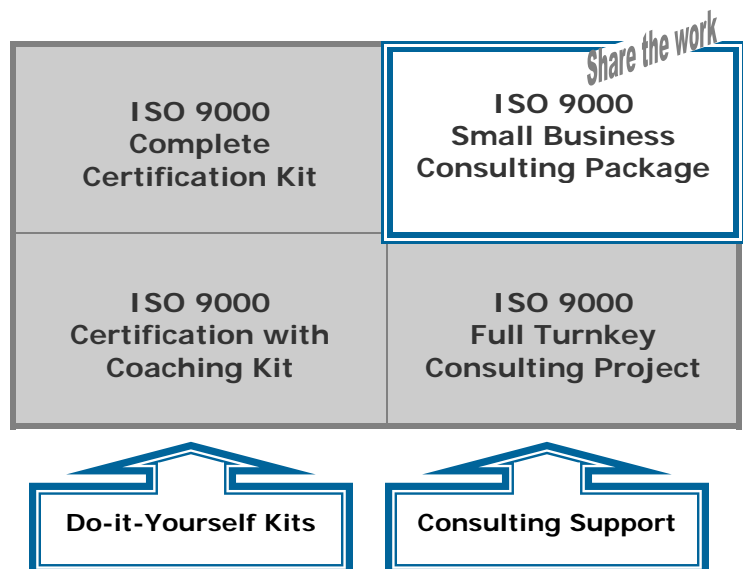

The question for the small business is "How can we get this done without the resources the big companies have?" The typical small business has:

- fewer staff
- little time
- limited budget

For some, a do-it-yourself approach like the **ISO 9000 Complete Certification Kit** or a coaching package like the **ISO 9000 Certification plus Coaching Kit** available from 9000 World is enough. These options are especially appropriate if you have someone on your staff who can dedicate the time needed to develop and implement your ISO system.

For others, you need the hands-on help of a professional consultant who can get it done because you just don't have the time to implement everything on your own. However, the typical budget for a **Full "Turnkey" Consulting Project** where the consultant does most of the work is often beyond what most small businesses can afford.

Which Option is Right for You?

THE PRACTICAL APPROACH FOR THE SMALL BUSINESS

An ISO 9000 consulting alternative for the small business is the **ISO 9000 Small Business Consulting Package** from 9000 World that gives you the hands-on support you need to get your ISO 9001 certification done but helps keep the cost down by having your staff work in partnership with our consultant to “share the work” of implementation. This not only helps with the budget, but it also gives your managers and employees a better understanding of your ISO system when we’re done.

This package includes:

- An initial site visit:
 - Site walk-through
 - Management training
 - ISO implementation training
- Remote project assistance:
 - Document preparation
 - “Virtual” project meetings
 - Project management
 - Registrar selection
- A second site visit:
 - Internal audit
 - Initial management review
- Project completion
 - Final preparations
 - Certification audit support

This program is for you if:

- You need to get ISO 9001:2008 Certification*
- Your company has 1 to 100*
- You have a limited budget for your ISO project*

YOU CAN BE ISO CERTIFIED IN 4 - 6 MONTHS

This hands-on approach means that we will work with you to simplify your ISO project. Using a proven set of ISO implementation templates and tools, your customized documentation will come together quickly so more time can be dedicated to helping everyone understand how to implement the new procedures and processes.

A typical timeframe is 4 - 6 month for certification.

This program gives the smallest businesses a practical, cost-effective solution to ISO Certification. Feel free to contact us if you have any questions or would like more details about the **ISO 9000 Small Business Consulting Package** available from the experts at 9000 World.
